

LifeKeeper® for Windows

The SteelEye LifeKeeper family of data replication, high availability clustering and disaster recovery solutions enable enterprises of all sizes to ensure continuous availability of business-critical applications, data and supporting IT infrastructure. SteelEye LifeKeeper for Windows offers enterprise-grade reliability while simplifying implementation with certified and easy-to-deploy solutions for a wide range of applications and databases running on all flavors of Windows 2003 and Windows 2008 including Standard, Advanced, Enterprise, and Datacenter versions.

SteelEye LifeKeeper provides fault-resilience for the most demanding enterprise deployments at a low cost by supporting configurations built on commodity servers and storage and by removing the need to make application environment changes. LifeKeeper delivers advanced monitoring of servers, networks, operating systems, applications and data along with automated healing capabilities based on policies set by system administrators to ensure that applications and data are always available. LifeKeeper for Windows

About SteelEye Technology

SteelEye is the leading provider of data and application availability management solutions for business continuity and disaster recovery for Linux and Windows and virtual environments.

The SteelEye family of data replication, high availability clustering and disaster recovery solutions are priced and architected to enable enterprises of all sizes to ensure continuous availability of business-critical applications, servers and data.

To complement its software solutions, SteelEye also provides a full range of high availability consulting and professional services to assist organizations with the assessment, design and implementation of solutions for ensuring High Availability within their environments.

is ideal in environments that run mission critical database and messaging operations and is today protecting Exchange, Oracle, IIS and SQL Server in major corporations world-wide. As customers look to deploy enterprise applications on Windows, they can be assured of the high availability benefits of LifeKeeper for Windows across the spectrum of Intel-compatible platforms. Supporting the widest range of server and storage configurations from simple LAN clusters to clusters across a Fibre Channel SAN to shared-nothing clusters built around data replication, LifeKeeper lets you deploy the solution that best meets recovery time objectives today while allowing for expansion in the future. With support for both Linux and Windows and the ability to manage both environments from a single console, LifeKeeper can protect the entire IT infrastructure regardless of platform.

With over 7,000 licenses installed in companies of all sizes world-wide, LifeKeeper has established itself as the gold-standard for High Availability Clustering, Data Replication and Disaster Recovery.

Key Features:

- Supports all versions of Windows Server 2003 and 2008
- Active/Active and Active/Standby Configurations of up to 32 nodes
- Data can reside on shared SCSI, singlepath or multi-path Fibre Channel SAN, iSCSI or on replicated volumes across either a LAN or a WAN
- Automated monitoring, failover and failback of all application and IT infrastructure components
- No requirement that all servers be identically configured
- Simple interface for manual movement of applications between servers to eliminate outages from planned maintenance
- Integrated Data Replication for disk-to-disk backup, shared-nothing clusters or WAN-based disaster recovery
- Out-of-the-box protection of:
 - Network Connections and File Shares
 - Microsoft IIS
 - Microsoft Exchange Server 2000, 2003 and 2007
 - Microsoft SQL 2000, 2005 and 2008
 - Oracle 10g and 11g
- LifeKeeper Extender lets you easily incorporate protection for any application
